

Greg's report to Council for July 6, 2009 meeting

- 1) Recycling – on July 4 I met with Rob Kidd, the SQCRD's new waste manager here, and shared information about improvements to both the recycling program and landfill system. We also discussed the BCUOMA waste oil issue and the ENCORP bottle deposit redemption situation. Rob has considerable experience in these areas and agreed to better inform me prior to my departure for UBCM this September, when we meet with Minister Penner.
- 2) TFT – I've been working with Ms. Ludlow on some of the licensure issues for project deliverables for our Towns for Tomorrow grant.
- 3) BC Hydro – this Wednesday Councillors Noddin, Johnson and I will be meeting with Gareth Clarke of BC Hydro to discuss strategies for demand side management (DSM) of electricity consumption here.
