

**Greg's report to Council for June 1, 2009 meeting**

- 1) Water Supply – I participated in Council's May 28 meeting with representatives of Dayton & Knight, our water system engineering firm.
- 2) Cemetery – today I went to the Cemetery to check on the state of the grounds, and was pleasantly surprised to find that our public works staff had mown a large portion of the one acre of grounds. Staff said that the Village's new (used) riding mower did quite well on what is largely uneven ground, due to its floating cutting deck. Congratulations to our Village staff for a job well done!
