

Report for council
Monday, April 20, 2009

Tuesday, April 7 – along with Mayor Kulesha and Councillors Martin and Johnson, I attended a teleconference seminar re: economic development.

Thursday, April 9 – I was at a special meeting of council to discuss the 2009 budget

Tuesday, April 14 – attended a CoW re: the OCP

Friday, April 17 – attended an emergency management workshop for elected officials put on by the Provincial Emergency Programme, North West Region which is under the Ministry of Public Safety and Solicitor General. We are now one step further to understanding our roles before, during and after whatever disaster may come our way.

Sunday, April 19 – I went to the Great Garbage Grab sponsored by the Sierra Club which has been the organizing force behind this clean-up for the past several years. And, we thank them for that!

In response to a request from Gwaii Trust to gather information about some informal statistics re: the need for social funding of food banks in our area, I was able to get replies from several people/agencies involved. This information will be forwarded to the Gwaii Trust directors who will consider the input from all of the communities.

HWAC members have been busy all week. We have been investigating what awards are available from professional associations that we might be able to access so that we can honour the physicians in our community. We are blessed with dedicated medical staff in our hospital – doctors and nurses. We want them to know that we appreciate all that they do for us. A nomination for a provincial award might be one way that could be accomplished.
