

Mayors report August 15, 2011

It may be summer but as you can see the office has been busy.

Over the past weeks I and other councilors met with SBC to continue our conversations on the fire departments working together, Jan Pointer completed the plain art box, we opened the office for those interested in the joint panel review instructions, received the Health Link information, and I met with representatives from ICBC. I also went to Stanley Lake to view our project. The new EDO for MIEDS Heather Hornoi is back. She has rearranged the office and its signage is easier to spot. She is actively meeting with community members and will continue to do so throughout the islands.

This week is the NWRHD and SQCRD meetings.
