

IN CAMERA REPORT TO COUNCIL

DATE: March 7, 2016
AUTHOR: Lori Wiedeman, Chief Administrative Officer
SUBJECT: Boat Launch Project Geogrid Textile Order

RECOMMENDATION:

That Council approves the purchase of Miragrid 20XT Geotextile Fabric for the price of \$30,906.75, to be used in the construction of the breakwater for the boat launch project.

BACKGROUND:

The Boat Launch project is currently delayed while the Village seeks additional funding. If we successfully secure funding and are still able to finalize the contract for work to begin this spring, there will not be enough time to order the Geogrid Textiles and have them shipped here. The rest of the materials are available on island. In order to ensure we are ready to begin the project we could order the Geogrid Textiles ourselves and then require the successful contractor to purchase it from us without making changes to the tender and the material is needed regardless of the final timeframe for the installation.

There are only two companies who have products that meet the engineering specifications for our project. Our Project Engineer Cord McLean of Skyline Engineering has reviewed the specifications for each product and confirmed that Miragrid 20XT meets the requirements for the project.

Company	Product	Price including shipping and taxes
LayField Group	Miragrid 20XT	\$30,906.75
LayField Group	Miragrid 22XT	\$36,556.55
Nilex	Strata Grid 1200	\$33,596.37
Nilex	Strata Grid 1300	\$39,064.59

BUDGETARY IMPACT OF RECCOMENDATION (if applicable):

The full cost of the Geotextiles will be invoiced to the successful contractor.

Budgeted Amount: n/a

Unbudgeted Amount: n/a
